**BOSCH**

Dr. Markus Sonnemann – VP Engineering MEMS – Robert Bosch GmbH

Markus is heading the pre-development of MEMS at Bosch providing advanced sensor concepts for automotive, consumer and multi-market applications.

He started at Bosch in the sensor development and held various management positions in the Bosch electronics engineering world as well as in strategy development.

Since 2014 he is back in the sensor development where he is focusing on the successful transfer of new technologies from research to volume production.
